## Experience

2024 - until now  
Echovision Digital Marketing - UAE (part time)

### Web Developer & Designer

- Website Solutions and Development Websites are powerful tools to showcase your business professionalism, facilitate effective communication, and drive successful marketing campaigns.
- We guarantee your website remains updated with fresh aesthetics, improved functionalities, and the latest trends. Our team also provides web analytics services, which include data collection, reporting, and analysis, enabling you to track your website's performance and achieve objectives, such as sales and potential customers.

2023 - until now  
BellaRose Medical Center in Dubai - UAE (full time)

### Web Developer & IT Support

During my tenure at Bellarose Medical Center, I have been responsible for multiple technical development and support tasks which include:

- Website Development and Management:
  - Designed and developed an integrated website featuring a self-service booking system to streamline the patient registration process.
  - Created interactive landing pages that effectively display services offered by the center, improving visitor engagement and user experience.
  - Utilized platforms such as WordPress and Wix to build and optimize websites, ensuring responsiveness and compatibility across different devices.
- Technical Integration and Data Support:
  - Linked electronic forms with the Customer Relationship Management (CRM) system to automate data entry and enhance efficiency.
  - Developed and monitored systems to ensure seamless data integration between the website, CRM, and WhatsApp, facilitating effective communication and relationship management with clients.
- IT Support and Maintenance:
  - Managed server updates and maintenance to ensure system operations are efficient and secure.
  - Provided technical support for the center, including installing and maintaining technical systems and troubleshooting various IT issues.
- Digital Marketing:
  - Utilized tools like Google Tag Manager to connect the website and landing pages with advertising campaigns on Google Ads and Facebook Ads, increasing campaign effectiveness and enhancing the center's online presence.
- HR System Development:
  - Was tasked with developing an HR system to streamline staff management and operational processes at the center, further automating and improving internal workflows.

These experiences have enhanced my technical skills and effectively contributed to improving the technical infrastructure of the center and increasing operational efficiencies.
