---

## Professional Summary

I am an electronics engineer, web developer, and content creator specializing in programming and web development. With two years of experience in the UAE, I've collaborated with companies across the UAE, Saudi Arabia, and Oman. I bring expertise in various programming languages, along with foundational skills in graphic design, digital marketing, SEO, and project management. Additionally, I offer training courses in programming fundamentals and web development, sharing knowledge to empower others in the field. My experience also includes CRM systems, administrative tasks, and HR, allowing me to provide integrated solutions for technical projects.

---

## Professional strengths include:

- Web Development & Design: Skilled in creating responsive, user-friendly websites.
- Project Management: Experienced in coordinating projects with CRM and HR knowledge.
- Technical Support: Proficient in server maintenance and troubleshooting.
- Content Creation: Creates engaging programming and web development content.
- Digital Marketing: Knowledgeable in Google Ads, Facebook Ads, and Tag Manager.
- Data Integration: Connects CRM systems to automate data processes.
- Video Production: Skilled in promotional and educational video production.
- Cross-Platform Development: Experienced with WordPress, Wix, and CMS platforms.
- Analytics: Proficient in web analytics for performance tracking.
- Multilingual Communication: Fluent in Arabic and English.
